affordably efficient

MERIT SERIES

13HPX

Economical,
energy-efficient
heat pump

The perfect choice for affordable, energy-efficient home comfort.

Reliable performance, ideal comfort and money-saving energy efficiency all come together in one perfect package in the Merit® Series 13HPX heat pump. Its dependable scroll compressor and high-efficiency outdoor coil work together to keep your home comfortable and your energy costs under control. Every component in the 13HPX is designed for exceptional durability and easy maintenance year after year.

Ideal comfort in every season

The 13HPX is an all-in-one cooling and heating system, perfectly suited to warmer climates. During summer months, it works like an air conditioner, extracting heat from inside your home and moving it outdoors. When the weather turns cooler, the process is reversed as the unit collects heat from the air outside and transfers it inside.

13HPX meets or exceeds 13.00 SEER,*
7.70 HSPF

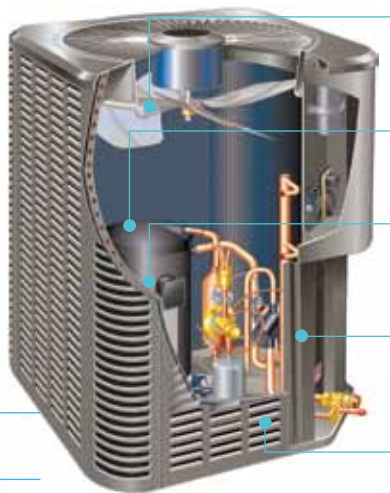

10-year limited warranty on the compressor and all remaining covered components.**

*Actual system efficiency may vary depending on the exact system match. Efficiencies are representative of a single AHRI Most Popular matched combination. Always verify actual system efficiencies through AHRI or by visiting AHRI ratings database at www.ahridirectory.org.

**Online equipment registration at www.lennoxregistration.com is required within 60 days of installation (except in California and Quebec) or Lennox' base warranty will apply. Applies to residential applications only. See actual warranty certificate for details.

Efficient, economical cooling & heating

Direct-Drive Fan – Precision-balanced direct-drive outdoor fan is designed to provide quieter operation and longer product life.

Dependable Scroll Compressor – Provides reliable and efficient operation.

High-Efficiency Outdoor Coil – Provides exceptional heat transfer and low air resistance for high-efficiency operation.

Corrosion-Resistant Cabinet – Protects against rust and corrosion with heavy-gauge, galvanized steel construction and a durable, baked-on finish.

Durable Louvered Coil Guard – Provides long-lasting coil protection.

SEER stands for "Seasonal Energy Efficiency Ratio" and is a measure of the cooling efficiency of heat pumps. The higher the SEER, the greater your energy savings. HSPF stands for "Heating Seasonal Performance Factor" and is a measure of the heating efficiency of heat pumps.
